SCENARIO 1 SENSUS

DAWN RAIN

The dawn rain scenario within a spa is designed to enhance the overall wellness experience, providing benefits both physically and mentally. This particular environment can serve as a preparatory phase for other thermal treatments, such as saunas or steam baths, facilitating the gradual adaptation of the body to higher temperatures. Warm water has the ability to open the pores of the skin,

aiding in the cleansing process and removal of impurities. This aspect harmoniously integrates into the beauty treatments and skincare offered within a SPA. The enveloping sensation of immersing oneself in warm water not only contributes to a pleasant state of physical relaxation but also plays a fundamental role in preparing the mind for a day dedicated to wellness.

SCENARIO 2 SENSUS

NIGHT MIST

Cold nebulisers within a spa enhances the thermal experience, providing various benefits for skin, circulation, and mental state. This element refreshes the skin, particularly valued after hot treatments, and stimulates blood circulation, improving tissue oxygenation and aiding muscle recovery. Mint aromatherapy enhances the experience, offering a fresher sensation. The blend

of cold mist and mint aroma creates a revitalizing, multisensory environment, enhancing overall well-being and leaving guests feeling rejuvenated and invigorated.

PROGRAM 1

ENERGY

The energy program features dynamism of jets, designed to awaken and energize the individual. This program, aimed at providing a boost of vitality, stands out for the alternation of contrasting temperatures, creating variations of warmth and cold that tone not only the muscles but also the skin. Ideal as a morning wake-up or as a final after a day in the SPA, the "Energy" program aims to reactivate the brain and stimulate the senses. Chromotherapy is an integral part of this experience, with the skillful use of warm colors. That alternate,

contributing to creating a dynamic and stimulating visual effect. Dynamic and tribal sounds, merge into a sensory rain dance, offering a stimulating and engaging auditory experience. Citrus aromas, such as lemon and oranges, add a fresh and lively touch, intensifying the sensation of energy and vitality.

PROGRAM 2

RELAX

The relax program has been designed to offer a complete experience of relaxation for both the body and the mind. The water pressure is soft and balanced, temperatures have not significant variation , creating a thermal environment that promotes body equilibrium. Chromotherapy plays a fundamental role in this program, using colors such as blue, indigo, and azure and all their associated shades. This chromatic selection aims to induce a mental state of deep relaxation, helping to create a soothing and calming atmosphere. Sound and aromatic

elements are carefully chosen to envelop the user in a sensation of serenity . Sounds like the gentle touch of a piano or the relaxing sound of light rain, along with fresh aromas, intensify the relaxation feelings , engaging all the senses in a harmony. In this context, the relaxation program offers a refuge of serenity and well-being, providing a precious opportunity to restore balance to the body and mind.
